Programming

TEAM PROJECT EXPERIENCE

Filmoteka [Link](#)

HTML, SASS, JS, REST API, PARCEL, LOCAL STORAGE

An application for receiving information about trending movies, search for movies by title and create a watched and queue list. Role: coder
Wrote the code for multiple sections of the website

Ice-cream shop [Link](#)

HTML, SASS,

An application for a landing page for a makeshift Ice-cream shop.

Role: team leader Reviewed and approved all GitHub pushes, conducted meeting to discuss the progress of the project, handled all code conflicts.

INDIVIDUAL PROJECT EXPERIENCE

Country Search [Link](#)

HTML, SASS, JS, REST API, PARCEL

An application to search for information about countries by their partial or full names. This application uses the public API Rest Countries. Application will display the country on a map

Memory Matching [Link](#)

HTML, SASS, JS

This is a single-player memory matching game where the player must match pairs of cards with the same value. The game starts with you picking the number of cards and the style of the deck

Image Search Gallery [Link](#)

HTML, SASS, JS, Rest API

A keyword search that retrieves images from the Pixabay API and displays them in a gallery. The users can determine the number of images to retrieve per page and how additional image get displayed
